Lamiflex obtains Nadcap® Accreditation for Composites

Ponte Nossa – Lamiflex, a leading Italian company specialized in the production of high-performance composite components for the Aerospace & Defense, Textile, Industrial, and Medical sectors, is pleased to announce that it has obtained **Nadcap® Accreditation for Composites**.

Nadcap® is an industry-managed program that brings together **major aerospace companies to ensure the highest standards for critical manufacturing processes across the Aviation, Defense and Space sectors**.

“Achieving this accreditation represents an independent validation of our capabilities in composite manufacturing”, said Edoardo Taddei, Aerospace and Defense Business Unit Manager. “This is more than a certification. **It is a guarantee for our existing and future clients** and a confirmation of the rigorous quality standard that guide our advanced composite manufacturing processes.”

This accreditation confirms Lamiflex’s ongoing commitment to meeting stringent customer requirements and industry specifications, while continuously enhancing process control, reliability and operational excellence.

Jay Solomond, Executive Vice President and Chief Operating Officer at the Performance Review Institute, said: “Nadcap® Accreditation is globally recognized as a hallmark of quality, and is a major accomplishment. For many years, the aerospace industry has incorporated Nadcap® into its approach for handling risk, as it demonstrates compliance to industry standard and customer requirements. I am delighted, therefore, that Lamiflex has achieved Nadcap® Accreditation for Composites, and that all their hard work has paid off.”

Hence, becoming accredited Nadcap®, Lamiflex joins a restricted pool of approximately **300 companies worldwide committed to the highest standard of quality in composites manufacturing** within the Aviation, Defense and Space sector.

About Lamiflex

Lamiflex®, headquartered in Ponte Nossa (Bergamo), is a leading company in the production of components in composite material for a wide range of sectors, including textile machinery, aerospace, medical and industrial, and applications such as Low Pressure Ducting for Environmental Control Systems and many more. Part of the Itema Group since 2017, Lamiflex® offers the widest range of in-house technologies available on the market – among them, Autoclave, Oven, Solvent Impregnation, Filament Winding, Pultrusion & Pull winding, Wrapping, Progressive and Multi-chamber Press, Autoclave, RTM and Low-Pressure Moulding Compound. Thanks to over forty-five years of manufacturing composite materials expertise, an entirely dedicated to the design of customized solutions, based on the specific needs of the customer, R&D team and the guarantee of the highest quality standards, Lamiflex® is the perfect partner to make Customers’ dream composite product come true.
